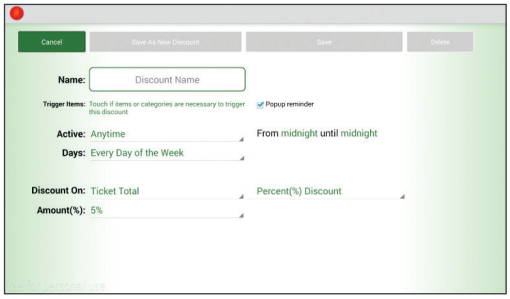
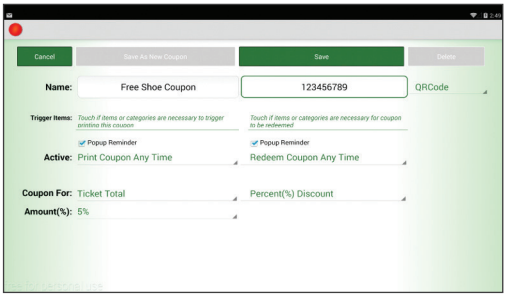
Advanced couponing and discounting made easy!

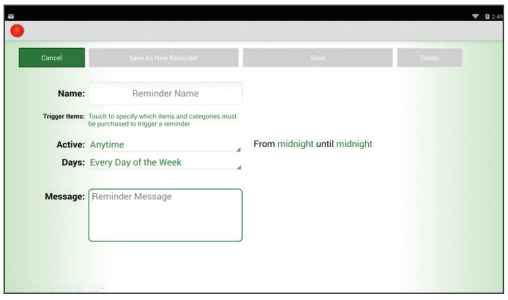
Increase your sales. Move slow-moving inventory faster. Drive more customers to visit and repeat. Until now it's been nearly impossible for the local merchant to quickly and easily set up their own coupons and combo discounts. Now you can discount like a pro by determining the products that trigger a discount, the amount of the discount or coupon, the item that is discounted and at what times during the week the discount applies.



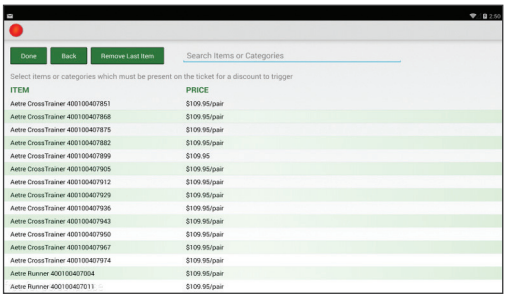
Select the timing, the item the discount applies towards, and the type of discount: $,%, or price leveling



Choose what triggers a coupon to be printed. Choose what item the coupon applies toward. Set your expiration dates



Product reminders allow you to remind your clerk to "pitch" products when specific products are purchased



Choose any item(s) or category(s) of items in your inventory to be part of your discount
